MEDICAL ASTROLOGY – A COSMIC SOLUTION TO HEART PROBLEMS

India has about 100 Million heart patients. 6 out of 10 heart patients of this world are Indian.

Present day India is living with a weak heart. Only 14% of the Indian-American men and 5% of Indian-American women have optimal HDL cholesterol level. This rate is almost 3-4 times the average HDL levels. Instead of one blocked artery, double or triple artery block is common among Indians. Even the third generation emigrants are at least four times more susceptible to Coronary Artery Disease (CAD) than Europeans, Chinese or Africans. The worst part is that the risk increases up to ten times in those younger than 40

MEDICAL ASTROLOGY – THE VEDIC SOLUTION

According to Vedas, astrology can play a vital role in pre-determining any disease which can happen in future.

- Astrology can pin-point affected body parts, detect the disease & also select right time for treatment.
- Planetary positions of Sun & Moon affect sea water causing tides.
- Blood contains fluid and salts in almost the same proportion.
- Our health is susceptible to same influence of Sun & Moon.
